

Empower people to be more productive with robotic process automation (RPA)

LET TECHNOLOGY TAKE CARE OF PROCESS SO THAT YOUR TEAM CAN GET ON WITH WORK THAT MAKES A DIFFERENCE TO YOUR BUSINESS

Many business operations involve tedious manual processes that drain resources without adding long-term value. While these non-cognitive tasks are usually seen as a frustrating waste of time, they are also crucially important and need to be completed accurately and quickly.

That's where RPA is transforming efficiency across the entire Financial Services Industry. As part of service excellence, RPA solutions effectively take care of a whole range of rule-based processes and administrative tasks, so that people can get on with being more creative, innovative and productive.

Almost 90% of general accounting operations and over 70% of financial reporting activity are highly automatable processes.

(Gartner)

Accelerate performance across mundane tasks

RPA emulates the actions that humans performs within a process, including how they interact with software and systems. Unlike humans however, RPA completes these actions at lightning speed and with complete accuracy.

As well as automating tasks, RPA can help with understanding the process and systems in place, identifying where efficiencies may be found and eliminating actions that no longer add value.

IDEALLY SUITED TO RULES-BASED TASKS

Compliance reporting

Invoicing and payroll

Account reconciliations

Staff onboarding

Cost analysis

Process documentation

Customer service

Streamline operations, simplify compliance and reduce costs

RPA can dramatically improve the quality of reporting, reduce costs of process inputs and increase efficiencies through faster cycles.

It is especially relevant for repetitive workflows and back-office functions, like invoicing, bank reconciliations and generating reports for compliance. In HR departments, it is also widely used to streamline a whole suite of functions, like onboarding and payroll.

RPA can reduce cycle times from hours to minutes

An end-to-end solution that combines TAS expertise with RPA innovation

By leveraging industry-proven technology such as UiPath® and ServiceNow®, we can take care of every aspect of your RPA initiative—from concept right through to implementation and beyond.

- Design a solution that meets your objectives
- Ensure compatibility with your current IT environment
- Arrange relevant licenses and application upgrades
- Develop and test your process automation solution
- Provide secure and scalable supporting infrastructure
- Ensure reliability through on-going management

Because RPA software sits on top of underlying systems and applications, it's simple to implement and it will not disrupt the technology you already have in place.

Leverage the renowned UiPath platform

As a global leader in RPA solutions, UiPath streamlines millions of tasks across thousands of organisations. Through inbuilt flexibility, the industry-specific applications can be tailored to your exact processes, while also offering scalability to meet any of your future RPA strategies.

With UiPath you can be assured of a highly capable and competent platform that offers:

- Broad application compatibility
- Fast and seamless implementation
- Minimal upfront investment
- Rapid ROI through cost savings
- Infinite scalability and reliability

You can read more about the range of UiPath solutions [here](#).

See RPA at work – arrange your demonstration

To showcase the power of RPA technology we'll be happy to provide you with a live demonstration that will show how quickly tasks can be completed. Simply send us an email and we'll be in touch to arrange a convenient time for your demonstration.
